WEBSITE BRIEF · FOR DEVELOPER

Making the Madhavam website work for plot buyers

Design, content and functionality updates for the concept site

PROJECT	MADHAVAM, approved gated plots, Raj Nagar Extension, Ghaziabad
PREPARED BY	Earthwaves Developers Pvt. Ltd.
DATE	14 October 2026
CONCEPT SITE	madhvamtype2.vercel.app
STATUS	Version 1, for developer scoping

Land is the New Gold

UP RERA UPRERAPRJ245925/09/2026 | www.up-rera.in

This brief lists the updates to be made to the Madhavam concept website. The current site presents the lifestyle well, but it does not yet help a plot buyer make a decision. A buyer comparing GDA-approved plotted projects in Raj Nagar Extension wants to know which plots are available, what the all-in cost is, what documents exist, and what the builder has already delivered. The items below close those gaps.

Content note: wherever a value is shown as [bracketed], Earthwaves will supply it (prices, approval numbers, dates). Please build the field or placeholder so it can be filled without developer help.

Scope at a glance

#	Item	Timing
1	Plot inventory and pricing	Build now
2	Cost calculator	Build now
3	Lead flow and conversion	Build now
4	Rewrite of the "Quality" section	Build now
5	Document center	Build now
6	Positioning: reconsider "Luxury"	Build now
7	Sample elevations and building guidelines	Later, after architect drawings
8	Expanded FAQ	Build now
9	Clubhouse pictures, amenities and media updates (additional)	Build now; entrance plaza and guard room visuals after architect submission
10	Technical requirements	Build now

01 Plot inventory and pricing

Problem: there is no price, rate per sq yd or availability anywhere on the site.

What to build

- A new section, "Plots and Pricing", placed immediately after the hero (before the gallery).
- A table or card view of the plot size bands, with the fields below. Use the brochure bands as the starting data:

Plot numbers	Size (sq yd)	No. of plots
01 – 27	120	27
28 – 36	125	9
37 – 60	100	24
61 – 71	143	11
72 – 73	175	2
76 – 79	100	4

Plot numbers	Size (sq yd)	No. of plots
80 – 89	103	10

Total 87 plots. Numbers 74 and 75 are not used in the legend; please confirm with Earthwaves how they should be labelled. Corner plots may differ in size (per brochure footnote).

- **Per-plot fields:** plot number, size in sq yd (with sq m / sq ft conversion), facing, corner or park-facing tag, [rate per sq yd], [total price], status (Available / Booked / Sold).
- **Interactive site plan:** make the existing layout image clickable. Tapping a plot shows its details and a "Enquire about this plot" button that opens WhatsApp pre-filled with the plot number. Use colour coding for status.
- **If prices are not to be published:** show "Starting from ₹[X]" or an all-in price range per size band, plus the highlights of the payment plan. Do not leave the section out.
- **Admin control:** status and price should be editable from a simple admin sheet or CMS, so the sales team can mark plots as booked without a developer.

02 Cost calculator

Most buyers of 100–143 sq yd plots will build a home, so they judge the project by the full cost of ownership, not the land price alone.

What to build

- A calculator where the buyer selects a plot size or plot number and sees an estimate of:
  - Land cost ([rate] × area)
  - Registry and stamp duty (configurable % so Earthwaves can update it)
  - Club, development and maintenance charges: [amounts to be supplied]
  - Approximate construction cost, with a per sq ft input that Earthwaves can set
  - Total estimated cost of owning a built home
- Show a short disclaimer: "Indicative estimate only. Final charges as per Builder-Buyer Agreement."
- A button at the end: "Get this estimate on WhatsApp" (captures name and phone).
- **Optional:** a line on plot loan availability and funding banks, if any bank has approved the project. Earthwaves to confirm.

03 Lead flow and conversion

What to build

- **Sticky mobile bar:** three fixed buttons at the bottom of the screen on mobile: Call, WhatsApp, Book Visit.
- **Brochure download:** a "Download Brochure" button that asks for name and phone first. This is a softer first step than "Enquire Now" and builds the lead list.
- **Site-visit scheduler:** a short form to pick a date and time slot, with a checkbox for "I need pickup from Delhi / Noida / Ghaziabad" and a field for pickup location.
- **One primary phone number:** the site currently lists three numbers, and the printed brochure shows 8826 45 8080. Use one primary number across the site and print material, and keep the rest in the footer only. Final number to be confirmed by Earthwaves.

- **Form behaviour:** every form submission should reach the sales team instantly by email and WhatsApp/CRM, and the visitor should see a clear thank-you message with the expected response time.

04 Rewrite of the "Quality" section

Problem: the section ("Built to last. Finished with care.") has four generic cards (Quality Construction, On-Time Delivery, Prime Location, Transparent Processes). The wording could describe any project, and the same illustration is repeated on every card.

What to build

- Replace the generic cards with specific, checkable points. Earthwaves will supply the facts; the layout should have room for:
  - Internal road specification and width
  - Underground electrical and utility lines
  - Water supply and sewer arrangement
  - Storm drainage
  - Development completion date as registered with UP RERA: [date]
- Use a different, relevant image for each card (site photos or renders), not the repeated placeholder illustration.
- **Add a "Proof of delivery" block:** Radhe Radhe Aaradhayam (71 plots, about 500 m from Madhavam, delivered in two years). Use real photographs and video of the delivered roads, gate and homes, the delivery timeline, and a short customer testimonial if available. This is the strongest trust asset and currently sits in one paragraph under "About Developer".
- **Fix the location wording:** the brochure says "centre of Raj Nagar Extension" while this section says "On Bhatta Road, Bhowapur". Use one consistent description across the site and brochure. Earthwaves to confirm the wording.

05 Document center

What to build

A "Documents" section (or page) with downloadable files and clear labels:

- UP RERA registration certificate, with the registration number UPRERAPRJ245925/09/2026 linked to up-rera.in
- GDA approved layout plan and approval number: [number and date]
- Sample Builder-Buyer Agreement (BBA)
- Project brochure (PDF)
- Include a UP-RERA QR code, as printed on the brochure, in the footer and the documents section.
- Each file should show the document name, date, and file size. Files are supplied by Earthwaves.

06 Positioning: reconsider the word "Luxury"

The page title, meta description and hero use "luxury plots". The product is a gated, amenity-led community of 100–175 sq yd plots, which is premium family housing rather than luxury. The wording should match what buyers search for and what they will actually see.

What to change

- **Page title (current):** "Madhavam | Luxury Plots in Rajnagar Extension, Delhi NCR"
- **Suggested direction:** "Madhavam | Approved Gated Plots in Raj Nagar Extension, Ghaziabad". Final wording to be confirmed by Earthwaves.
- Apply the same change to the meta description, Open Graph and Twitter tags, hero sub-line ("Luxury residential plots amidst nature") and the alt text of images.
- The tagline "Land is the New Gold" and the main headline can stay.

07 Sample elevations and building guidelines

> **Phase 2. Not to be built now. This item starts after the architect's drawings are received. For now, the developer only needs to reserve a place for it in the layout (a menu entry or a "Coming soon" placeholder, as agreed).**

What will be added

- Sample elevations and floor plans for the 100, 120 and 143 sq yd plots.
- A "Building guidelines" box per plot size, covering permitted floors, ground coverage and setbacks as per GDA norms. This turns "Full design freedom" into something specific.
- A viewer for the drawings (image gallery with zoom, plus PDF download).
- A link from each plot card in the interactive site plan to the matching sample design.

08 Expanded FAQ

The current FAQ answers "what, where and who". Add the questions buyers actually ask before booking. Answers will be supplied by Earthwaves.

Questions to add

- What is the registry process, and what are the stamp duty and registry charges?
- What are the maintenance charges, and who maintains the common areas?
- Is club membership included, and is there a separate charge?
- What is the possession timeline?
- Is there a deadline to start construction after possession?
- Can I resell or transfer my plot? What is the process?
- Can NRIs purchase a plot here?
- Can I take a loan for the plot? Which banks fund it?
- What can I build on a 100 / 120 / 143 sq yd plot (floors, setbacks)?
- What is the payment plan?
- **Implementation:** keep the accordion format. Add FAQPage structured data so answers can appear in Google results.

09 Additional suggestions: clubhouse pictures, amenities and media updates

Observation: the brochure lists a Toddler Play Area inside Club Madhavam (indoor) and a Kids Play Area with a Tot-lot (outdoor). On the website, the toddler play area appears only inside one FAQ answer, and the gallery shows only "Kids Play Area". The clubhouse facilities are also described only in text. Families with young children are a core buyer group for this project, so the clubhouse and play areas deserve visibility.

9A. Club Madhavam pictures

- Add dedicated pictures for the four clubhouse facilities below, each with its own image and a short caption, in the "Clubhouse" filter of the gallery and in the amenities section:
  - Gymnasium (AC)
  - Yoga and Zumba room
  - Indoor games room
  - Toddler play area
- The multipurpose hall with pantry may keep its existing image.
- Mark all renders as "Artistic impression", consistent with the brochure. Images are supplied by Earthwaves; the developer should leave room for the new pictures in the gallery and not use stock images as substitutes.

9B. Amenities section and changes to the list

- Add a dedicated amenities section with icons, split into Outdoor and Indoor, based on the brochure but with the changes below:
  - Outdoor: entry/exit gate, guard room with toilet, entrance area, entrance plaza (new, see 9C), lush green lawn with jogging track, kids play area and tot-lot, sculpture model, badminton court, cricket net practice pitch, yoga lawn, flower garden, pet relief area, electric sub-station
  - Indoor (5,500 sq ft clubhouse): multipurpose hall with pantry, AC gymnasium, yoga and zumba room, indoor games room, toddler play area
- **Remove the Park Gazebo:** it must no longer appear anywhere on the website. This includes the amenities list, the FAQ answer to "What amenities does Madhavam include?", gallery captions, image alt text and any site plan legend or key. The printed brochure still lists it, so Earthwaves will update the brochure separately.
- Mention the toddler play area and kids play area in the "Benefits" list as a family-safety point, for example: "Dedicated play areas for toddlers and children inside the gated community".

9C. Entrance Plaza (new amenity, design to follow)

- Add "Entrance Plaza" as an additional outdoor amenity.
- The design will be provided by the architect in future. Until then, show it in the list with a "Design to be updated" note internal to the team (not visible to buyers), and do not publish any image or render for it.
- When the architect's design arrives, add it to the gallery (Aerial View and Landscapes categories) and update the amenities section and FAQ text if needed.

9D. Guard room design change (media update)

> **The guard room design will change as per the architect's submission. All media showing the guard room will therefore be updated later. Please plan for this now so the site does not need to be rebuilt.**

- Wherever the guard room or entry gate appears (aerial views, entrance images, hero video, site plan image, brochure download), treat those images as temporary and keep them easy to swap without a code change.
- Do not create new gate or guard room visuals, thumbnails or social share images now. Wait for the architect's drawings and the updated renders from Earthwaves.
- Keep the brochure PDF download linked to a replaceable file, so the updated brochure can be uploaded without changing the page.
- Earthwaves will tell the developer when the new media is ready. The same drop will include the entrance plaza design (9C) and the building drawings (item 7).

10 Technical requirements

TECHNICAL CHECKLIST FOR DEVELOPER

- **Hero video:** compress the hero video, add an MP4 fallback alongside WebM, and test on iPhone Safari and on a slow 4G connection. Use lazy loading for images and videos below the first screen.
- **Canonical URL and indexing:** the page currently declares https://madhavam.ewdevelopers.com/ as canonical while the concept site sits on Vercel. Make sure only one version is indexable (no duplicate content).
- **Structured data:** add LocalBusiness / RealEstate schema, plus FAQPage schema for the FAQ.
- **Analytics and tracking:** GA4, Meta Pixel, and UTM capture on every form. Consider call tracking per traffic source, since plot sales are mostly phone-driven.
- **Consent and privacy:** add a consent checkbox on every form, aligned with the DPDP Act, linked to the Privacy Policy.
- **Language:** add a Hindi / English toggle for key sections (hero, plots and pricing, FAQ, contact).
- **Navigation order:** Plots → Site Plan → Location → Amenities → Quality → About → FAQ → Contact. The current menu opens with Gallery.
- **Mobile first:** most traffic will be on phones. Test every section, the interactive site plan and the calculator on small screens.
